

The 3rd International Chinese Musculoskeletal Research Conference and the 5th International Biomedical Forum of West China

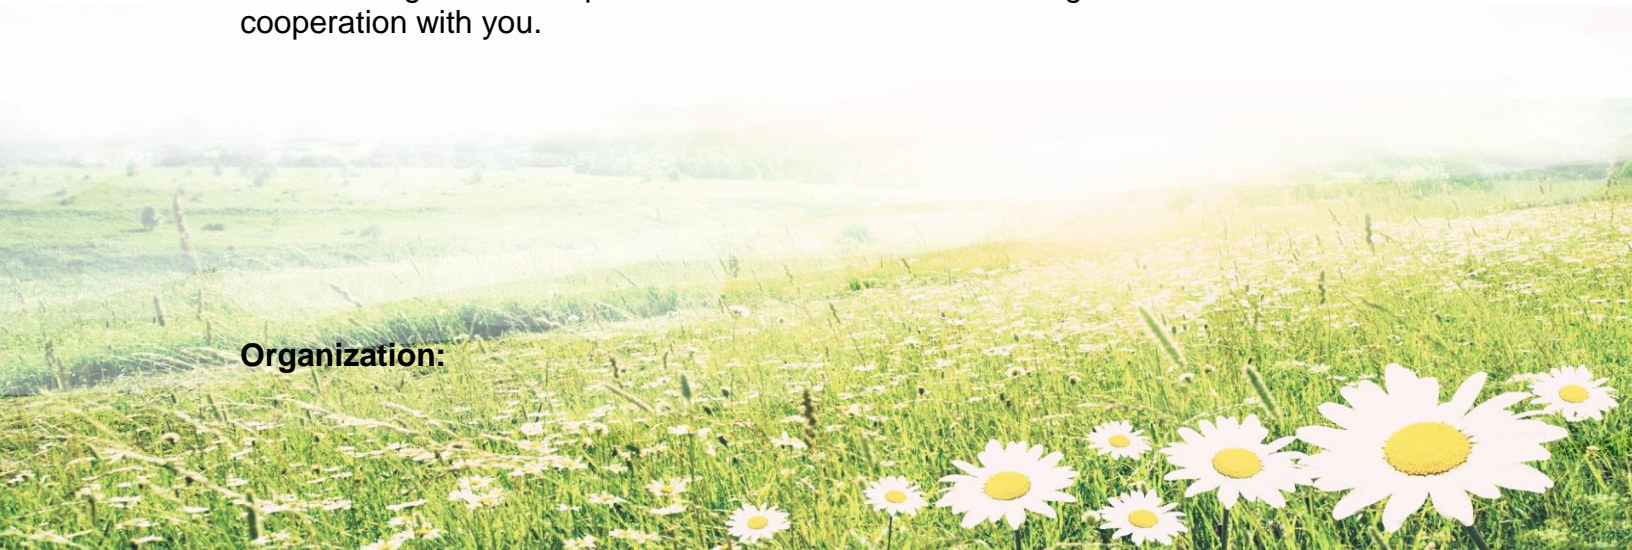

The 3rd International Chinese Musculoskeletal Research Conference (ICMRC) will be held together with the 5th International Biomedical Forum of West China in Shihezi, the beautiful city known as “The jade of desert”, after the international orthopaedic conferences in Suzhou and Changsha. This combined meeting will be made possible through the sincere cooperation of International Chinese Musculoskeletal Research Society (ICMRS), relevant departments of Xinjiang Production & Construction Corps, Shihezi University and Xinjiang Medical University.

The 5th International Biomedical Forum of West China, hosted by Shihezi University and jointly organized by ICMRS, is an international academic conference aiming at promoting the biomedical research level, promoting the development of medical field. It also aims to improve the level of diagnosis, treatment and comprehensive prevention of major diseases in the West China, especially in Xinjiang, by academic exchange and research collaboration with domestic and foreign colleagues in related fields.

The theme of this conference is to “**Enhance basic research, promote scientific and technological innovation, and serve The Belt and Road**”. Aiming at enhancing communication among medical research colleagues, spreading the latest research findings and expanding the international view of domestic scholars, we will invite leading scholars from the United States, Australia, Japan, and excellent domestic scholars from Hong Kong, Macao, Taiwan and the mainland. They will be encouraged to share the cutting-edge research findings and technologies in the biomedical research field through the exchange of scientific information by various means, including presentations, seminars, and posters.

We cordially invite you to join us in the city of Shihezi and look forward to commencing a new chapter of biomedical research through communication and cooperation with you.
